This game will test itself and provide data to show that the game's circuitry and controls are operating properly. The data is provided on the video display and speakers. No additional equipment is

We suggest you perform the self-test procedure when you first set up the game, any time you collect money from the game, when you change game options, or when you suspect game failure.

[■]Manufacturer's recommended settings for Upright cabinet. ★ Manufacturer's recommended settings for Sit-Down cabinet *This option setting can be changed to 1 coin for 6 credits by changing the program PROM (136014-160). Contact your distributor for further information.

If you have NAMCO game PCBs, refer to

CO-218-01 for the location of the option

switches.

If the operation, maintenance and service manual was not included in this game when you unpacked it, contact your distributor to get a free copy. (All Atari manuals for coin-operated games also in-

8. To end the test, switch the self-test switch to off.

Important Note to Operators:

clude complete illustrated parts lists.)

Self-Test Procedure

CAUTION

Do not depress the accelerator or brake

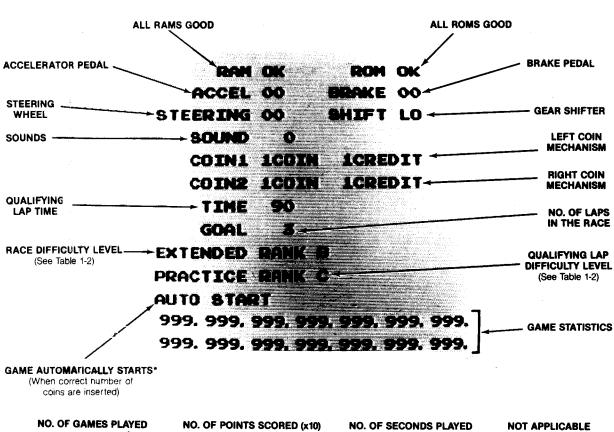

pedal when turning on the game or

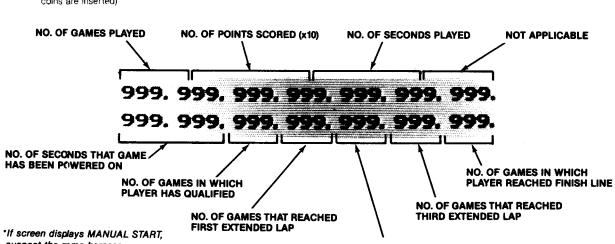

switching to the Self-Test Mode. This will

cause faulty program initialization and in-

correct action of the player controls.

| Ins | struction | Test Passes |
|-----|--|--|
| 1. | Without touching the pedal(s), set the self-test switch to the on position. All credits will be cancelled. | Random symbols are displayed on the screen for about five seconds. The self-test display appears. RAMs and ROMs are tested. If the screen is different from the self-test display, or if there are sounds, refer to Chapter 2, Self-Test Procedure. |
| 2. | Press down on the accelerator pedal. | The numbers to the right of ACCEL increase from 00 to somewhere between 90 and A0 as you press down on the pedal. If the test fails refer to Chapter 2. |
| 3. | Press down on the brake pedal of the Sit-Down cabinet. | The numbers to the right of BRAKE switch from 00 to FF. For the Upright cabinet, the numbers to the right of BRAKE should always read 00. If the test fails, refer to Chapter 2. |
| 4. | Turn the steering wheel clockwise, then counterclockwise. | Rotating the wheel clockwise causes the numbers to the right of STEER-ING to increase. Rotating the wheel counterclockwise causes the numbers to decrease. If the test fails refer to Chapter 2. |
| 5. | Shift the gear shifter. | The words to the right of SHIFT change from LO (shifter up) to HI (shifter down) as you shift gears. If the test fails, refer to Chapter 2. |
| 6. | Shift the gear shift, press the auxiliary coin switch, and activate the coin switches. | The numbers to the right of SOUND increase from 00 to 20, and a new sound is played with each number. Test all 20 sounds. If the test fails, refer to Chapter 2. |
| 7. | Press the auxiliary coin switch. | Game statistics appear (for a few seconds) at the bottom of the screen. Press the coin switch each time you want to see the statistics. To erase game statistics, simultaneously press down on the accelerator pedal and press the auxiliary coin switch twice. Statistics will be reset at /999/. To reset the high-score table, simultaneously press down on the accelerator pedal and change gear shifter from low to high. The high-score table will be reset and contain fictitious scores. |

suspect the game harness. Refer to the Schematic Package.
